hanseclean[®]

creative paving

Welcome to a wide range of high-quality products from hansebeton.

Products bearing the label „made in Germany“ are not unusual in today's market and enjoy an outstanding reputation for high quality and innovation. hansebeton offers a range of high quality and innovative concrete block and flag paving products manufactured in Germany. We offer a range of high quality paving products, with an outstanding choice of colours. The innovative approach to the marketplace has seen the development of hanseclean® a factory-applied coating system delivering long-term stain resistance and a number of other significant benefits, including drastically reducing the problems associated with chewing gum adhesion.

Welcome to a world full of ideas, quality and choice. Welcome to hansebeton-STEIN where product quality and service are as important to us as they are to you.

Domino® Facette flag paving

Flagstones featuring stars and decorative diamonds and borders in almarine, conelian and jurawhite create a dazzling decoration. Reach for the stars with the new terrace flagstones from the Domino® series.

8er star, almarin

big star, jurawhite

north star, conelian

Domino® Facette flags are available in standard 40 x 40 x 4 cm size, requiring 6.25 flags per square metre. The flags are two-layered, chamfered, with no spacer lugs and modified surface (Other sizes and thicknesses available to order) (Corporate logos and branding can be achieved using this paving) finish and comply with DIN EN 1339.

The impressive and characteristic effect of the Domino[®] Facette blasted flags stems from the particular blend of coloured and hardened natural stone dust with coloured chippings from around the world. Individual Facette flags are also available ground and blasted.

Hoegl traditional (H 210)

Good quality will win recognition. We are convinced of this. This is why we developed the hanseclean® coating and production process.

Paving flags with hanseclean[®] DoublePlus coating

hansebeton-STEIN paving flags, treated at the production stage with hanseclean[®] DoublePlus coating, will repel dirt for years, thanks to their sealed pores and special finish, they are easy to clean, stain and chewing gum resistant and their brilliant colours and gloss finish are sure to appeal.

Paving and flags with hanseclean® DoublePlus coating.

hanseclean® DoublePlus coating is manufactured to a specific product formula in a designated production facility using a special process. The new hanseclean® production process is the result of two years development by hansebeton-STEIN. The Block paving and flag-paving used in the hanse-clean process are specially

manufactured to achieve the highest quality and finish. In the first stage of the manufacturing process a protective layer is applied completely sealing the pores of the concrete surface. This is hardened with UV light and then, in an additional operation, a top layer is applied to this base layer.

There are many good reasons for choosing hanseclean®. Its stain and chewing gum resistance, but the most important is the lifelong pleasure that comes from hanseclean®'s quality.

It's a familiar problem, how do you keep your hard landscaping looking like it did on day one? We have the answer: stains and dirt from food particles and engine oil as well as leaves and surface growth such as moss penetrate the concrete and spoil the appearance of the paving.

This is no longer a worry with hansebeton-STEIN paving and flags incorporating hanseclean® coating.

Whether for domestic, commercial or industrial use, hanseclean® DoublePlus coating ensures lasting pleasure from attractive clean surfaces whatever your project requirements

And no need for subsequent impregnation or additional treatment.

Block Paving and flags pre-treated with hanseclean® DoublePlus coating at the production stage feature sealed pores and a special dirt-repellent surface whose colour keeps its brilliance and gloss finish.

What is more, thanks to hanseclean® DoublePlus coating, paving and flags require less frequent cleaning consuming less energy. A benefit to both the environment and your wallet.

All in all, some excellent and convincing arguments for choosing the new hanseclean®.

Trento with hanseclean® DoublePlus coating. The perfect combination of design, functionality and quality. Trento with hanseclean® DoublePlus coating is manufactured in three colours and three sizes, enabling efficient laying. The paving can be laid in a variety of ways. Gentle curves can even be introduced effectively into paths and open areas.

Trento with hanseclean® DoublePlus coating.

Trento with hanseclean® coating is an impressive example of the qualities offered by modern block paving. Gently curving surfaces, irregular structures, carefully selected natural stone facing – Trento with hanseclean® coating is sure to please.

Colours and dimensions

Size l x w x d (cm)	paviors required per m ²
15,0 x 14,0 x 8,0	47,6 paviors
22,5 x 14,0 x 8,0	31,7 paviors
28,0 x 22,5 x 8,0	16,0 paviors

Two-layered, no chamfer, with spacer lugs and shotblasted Trento finish, complies with DIN EN 1338.

sandwall

Paving with hanseclean® DoublePlus coating will instantly appeal for several reasons. Firstly its gloss finish, secondly the lasting brilliance of its colours.

And perhaps most importantly: unattractive and troublesome stains and chewing gum is less able to damage your new surface and are easier to remove.

Concrete products from Germany. As one of northern Germany's leading manufacturers hansebeton-STEIN produces and sells a comprehensive range of high quality concrete products. Paving and flags and other construction products for the domestic, commercial and public sector.
