INNOVATIVE STREET SOLUTIONS

Brighton & Hove footway widening

Client	Brighton & Hove Council
Contractor	Edburton Contractors
Supplier	Bomax
Material	Scan Kerb types A & B in various locations

Brighton & Hove Council, as part of the Governments Covid 19 initiative on social distancing undertook a series of footway widening schemes at various locations around Brighton. This was to be undertaken as quickly and efficiently as possible with as little disruption to the public

Bomax Scan Kerb was chosen for the project, due to the product availability with substantial UK stock holding, the speed and ease of installation, a no dig solution ruling out the risk of service strike, and with no material to cart away, the stick down kerbing solution saved many hours on installation time, cut down on the noise and dust pollution and reduced the amount of traffic disruption through the installation period, the overall finished appearance looks like a traditional kerb run

Edburton contractors, who had not used the product previously, were delighted with the way the kerb installed and the kerb layers themselves found it much quicker lighter and easier than traditional kerbs

The overall appearance of the finished project is very good, the client Brighton & Hove are pleased with the outcome and speed of installation to meet the Governments requirements

Approx 400Lm of kerbs were installed in 3 separate locations, over a four day period

London Rd , Brighton. Western Rd Brighton and Church Rd Hove

Alan Watts, Contracts Manager for Edburton Contractors Ltd— said “they were very pleased with the products and suggested that there is likely to be more work to come in the near future.
